Welcome to your Drupal 8 Web site

Your departmental web site supports a number of different kinds of content. The homepage is organized by regions, and content from some of these content types are displayed in various blocks in these regions.

Table of Contents

Click on the content types to find out more about what they are:

- **Article** — Allows you to post Departmental News
- **Basic Page** — Allows you to post mostly static information that changes infrequently (ie NOT news, events, directory listings, etc)
- **Courses** — Allows you to provide basic information about courses
- **Event** — Allows you to post upcoming departmental events based on dates
- **Lab** — Allows you to post information about Research Labs in your department.
- **Personnel** — Allows you to provide contact information, biography, CV, research, publications, etc for a Faculty & Staff directory
- **Research Area** — Allows you to list the different types of research being done in the department.
- **Slide** — Allows you to load large dynamic images as "sliders" in your homepage

General Homepage Diagram

The site diagram below shows an example site and how they have chosen to integrate various pieces of content in their homepage.
OUR MISSION

The Department of Geology provides the highest-quality teaching and research possible, with a strong vision for the future. Our faculty, students, and staff are dedicated to excellence in teaching, research, and service. We are committed to incorporating innovative and creative teaching methods into our courses to make the learning process more engaging and effective. Our research encompasses a wide range of disciplines, from Earth systems science to paleoanthropology.

PROJECTS FOR UNDERGRADUATE STUDENTS

A $500,000 grant awarded by the National Science Foundation supports projects led by faculty members to create innovative undergraduate research opportunities for students.

PROJECTS FOR GRADUATE STUDENTS

Graduate students are encouraged to pursue advanced research projects in a variety of areas, including geology, paleontology, and environmental science.

RECENT NEWS

GEOLGY STUDENTS ARE THE HARVEST ON COLLEGE CAMPUS harvestamura

Geology students are recognized as the “harvest” on campus, with their creativity and innovation contributing to the college’s success and reputation.

SUPPORT GEOLGY AT UGA

By donating, you support the mission of providing the highest-quality teaching and research opportunities for students and faculty. Your gift makes a significant impact on the future of geology.

UGA INTERDISCIPLINARY FIELD PROGRAM

A student at work on a fossil in the Paleobiology and Geology Museum. She is preparing for the upcoming field program in which she will study the geology and paleontology of the region.

OUR GRADUATE PROGRAM

Our graduate program is designed to provide the highest level of education and research opportunities for students. We offer a range of coursework and research options to help students achieve their career goals.
