Welcome to your Drupal 8 Web site

Your departmental web site supports a number of different kinds of content. The homepage is organized by regions, and content from some of these content types are displayed in various blocks in these regions.

Table of Contents

Click on the content types to find out more about what they are:

- **Article** — Allows you to post Departmental News
- **Basic Page** — Allows you to post mostly static information that changes infrequently (ie NOT news, events, directory listings, etc)
- **Courses** — Allows you to provide basic information about courses
- **Event** — Allows you to post upcoming departmental events based on dates
- **Lab** — Allows you to post information about Research Labs in your department.
- **Personnel** — Allows you to provide contact information, biography, CV, research, publications, etc for a Faculty & Staff directory
- **Research Area** — Allows you to list the different types of research being done in the department.
- **Slide** — Allows you to load large dynamic images as "sliders" in your homepage

General Homepage Diagram

The site diagram below shows an example site and how they have chosen to integrate various pieces of content in their homepage.

SUPPORT GEOLOGY AT UGA

By giving, you support a number of programs and projects that help students succeed. Your gift helps support the following:

- Undergraduate education and research
- Graduate education and research
- Outreach and public service
- University-wide initiatives

Your gift helps to fund research, travel, and field experiences for students and faculty.

UGA INTERDISCIPLINARY FIELD PROGRAM

A student and professor team up to explore the North Carolina Piedmont. This project is led by the North Carolina Piedmont Field Program.

For more information, visit the North Carolina Piedmont Field Program website: northcarolinafieldprogram.org
