Is my unit's website hosted with Franklin on the Drupal Content Management System?

Overview

In Franklin, we use a content management system called Drupal to build websites. If you have ever used Wordpress, Joomla, Squarespace or Wix, these are all types of content management systems.

It is helpful to know whether your unit's site is hosted with us, and which version of Drupal your unit is using. This can direct you to the right self-help documentation.

### My unit is not listed anywhere

A few Franklin units have very customized sites, or are hosted elsewhere.

- The Hugh Hodgson School of Music is a Drupal 7 site, but it is heavily customized and therefore has its own special documentation held by those with access to the built-in applications.
- The Lamar Dodd School of Art is a Drupal 7 site hosted by EITS.
- Drama and Physics and Astronomy are not hosted by Franklin.
- Some other centers and institutes are also not hosted by Franklin.
