Welcome to your Drupal 8 Web site

Your departmental web site supports a number of different kinds of content. The homepage is organized by regions, and content from some of these content types are displayed in various blocks in these regions.

Table of Contents

Click on the content types to find out more about what they are:

- **Article** — Allows you to post Departmental News
- **Basic Page** — Allows you to post mostly static information that changes infrequently (ie NOT news, events, directory listings, etc)
- **Courses** — Allows you to provide basic information about courses
- **Event** — Allows you to post upcoming departmental events based on dates
- **Lab** — Allows you to post information about Research Labs in your department.
- **Personnel** — Allows you to provide contact information, biography, CV, research, publications, etc for a Faculty & Staff directory
- **Research Area** — Allows you to list the different types of research being done in the department.
- **Slide** — Allows you to load large dynamic images as "sliders" in your homepage

General Homepage Diagram

The site diagram below shows an example site and how they have chosen to integrate various pieces of content in their homepage.
OUR MISSION

The Department of Geology provides the highest-quality teaching and research opportunities in geology and geosciences for students in the University of Georgia and beyond. Faculty and graduate students work together to answer questions about Earth and planetary systems. The Department provides undergraduate degrees in Geology, Geophysics, and Geomatics Engineering, and graduate degrees in Geology, Geophysics, and Geomatics Engineering. The Department's research programs span a broad spectrum of topics, from mineralogy and petrology to geodynamics and paleoceanography. The Department's mission is to advance knowledge of Earth and planetary systems and to educate students to become leaders in the field of geology.

PROJECTS FOR UNDERGRADUATE STUDENTS

The Department of Geology offers a broad range of projects for undergraduate students to explore topics in geology and geophysics. These projects can range from fundamental research to applied projects that address real-world problems. undergraduate students interested in pursuing research in geology are encouraged to contact faculty members in the Department to learn more about opportunities.

PROJECTS FOR GRADUATE STUDENTS

The Department of Geology offers a wide range of graduate programs in geology, geophysics, and geomatics engineering. graduate students have the opportunity to work on cutting-edge research projects that address fundamental questions in geology and to develop their skills in research and communication. graduate students interested in pursuing research in geology are encouraged to contact faculty members in the Department to learn more about opportunities.

RECENT NEWS

GEOLGY STUDENTS ARE THE HARVEST ON COLLEGE CAMPUS YESTERDAY

November 9, 2023

Geology students were among the first to arrive at the University of Georgia for the college's annual harvest festival. The event features a variety of activities, including a pumpkin patch, a petting zoo, and a live performance by the university band. The festival is held each year to celebrate the college's vibrant community.

SUN ENERGY VISITS UGA GEOLOGY

November 9, 2023

A representative from the energy company Sun Energy visited the Department of Geology to discuss the role of geology in the energy sector. The representative met with faculty members and students to discuss the applications of geology in the energy industry and the importance of education in preparing the next generation of geologists.

PROFESSOR HELMANN LEADS INTERNATIONAL PALEOECOLOGY FIELD COURSE

September 15, 2023

Professor Helmann led a field course on the role of paleoecology in understanding past climates. The course was offered in partnership with the University of Cambridge and took place in the Ecuadorian Amazon. Students participated in fieldwork and laboratory activities to learn about the role of paleoecology in understanding past climates.

SUPPORT GEOLOGY AT UGA

By giving, you support a mission of providing the highest-quality teaching, research, and community service to the people of the state of Georgia, the nation, and the world. Your gift advances our understanding of Earth and planetary systems and provides opportunities for education and research.

OUR GRADUATE PROGRAM

The Department of Geology offers graduate degrees in Geology, Geophysics, and Geomatics Engineering. Our program is designed to provide students with the skills and knowledge necessary to succeed in a variety of careers in academia, government, and industry. The program includes coursework, a research component, and a dissertation. Students have the opportunity to work closely with faculty members to pursue their research interests.
