Welcome to your Drupal 8 Web site

Your departmental web site supports a number of different kinds of content. The homepage is organized by regions, and content from some of these content types are displayed in various blocks in these regions.

Table of Contents

Click on the content types to find out more about what they are:

- Article — Allows you to post Departmental News
- Basic Page — Allows you to post mostly static information that changes infrequently (ie NOT news, events, directory listings, etc)
- Courses — Allows you to provide basic information about courses
- Event — Allows you to post upcoming departmental events based on dates
- Lab — Allows you to post information about Research Labs in your department.
- Personnel — Allows you to provide contact information, biography, CV, research, publications, etc for a Faculty & Staff directory
- Research Area — Allows you to list the different types of research being done in the department.
- Slide — Allows you to load large dynamic images as "sliders" in your homepage

General Homepage Diagram

The site diagram below shows an example site and how they have chosen to integrate various pieces of content in their homepage.
OUR MISSION

The Department of Geology provides the highest-quality teaching and research in the field of geology. Our students are equipped with the scientific knowledge and skills necessary to succeed in a variety of careers in geology, and they are prepared for advanced study and graduate work.

PROJECTS FOR UNDERGRADUATE STUDENTS
- The Appalachian Geology Laboratory offers a variety of opportunities for undergraduate research. Students can participate in fieldwork, laboratory analysis, and data collection.
- The Geology Laboratory provides resources for undergraduate research projects, including equipment and facilities.

PROJECTS FOR GRADUATE STUDENTS
- The Geology Laboratory offers opportunities for graduate research in a variety of areas, including geology, paleontology, and geochronology.
- The Geology Laboratory provides resources for graduate research projects, including equipment and facilities.
