### Basic Pages (and all content types with a text editor field)

Here’s some text. faucibus ac eleifend nec, aliquet vel purus ac.

*morbi vivamus eu augue ac in*

- *morbi vivamus eu augue ac in*

- *morbi vivamus eu augue ac in*

### Standard Image size:

- **Cropping ratio - does not apply**
- **Cropping ratio - does not apply**
- **Minimum**: no minimum
- **Maximum**: 860 pixels wide by 860 pixels high (full width of content column)
  - **If you insert an image larger than 860 pixels, Drupal will automatically crop the image.**
  - **Excessively large images**—usually greater than 2000 or 3000 pixels—have been known to “white-screen” the page when Drupal attempts to crop. You
may want to process and pre-crop some images, especially if they are straight from a camera or mobile phone.

A note on captions and alignment

If you make use of the caption feature, it will change your image based on how it is aligned.

It is recommended that you choose an alignment when using captions.

You’ll have the option to use captions when you insert an image. Notice the checkbox for captions toward the bottom of the screen:

Beneath the image, you’ll see a place to add a caption:

I have added the text: “Wanda Landowska at her harpsichord.”

Here’s how the edit screen looks after I have added my caption.

After I save my content, the captioned image will take on a certain form based on how I have chosen to align it.
**Right or left alignment:** the image will be 50 percent of column width.

**Center alignment:** the image will fill the content column 100 percent.

"None" alignment: If you don't provide an alignment when you are using captions-- ie, set it to "none"-- you'll end up with extra gray space next to your image, as seen in the below example:
