ArcGIS Pro: Licensing and Logging in

ArcGIS Pro is available for licensed UGA users. To use the software, there is an extra process needed to verify your credentials before the program will be available to you.

1. Create an ArcGIS Account

⚠️ If you already have an University of Georgia ArcGIS Online (AGOL) account, skip to Step 2. This step is only for new users.

New users will need to create an ArcGIS account by going to https://usg.maps.arcgis.com and logging in, via the sign-in option in the upper-right-hand corner of the screen. You will then be taken to a new screen to confirm that you wish to log in with UGA's Single Sign-On. Click the blue SSO box.

You'll be taken to the UGA SSO page. Log in with your MyID.

Your account will be created and you should have the appropriate licenses assigned to your account.

2. Log into ArcGIS Pro

Computers supported by Franklin College Office of Information Technology with ArcGIS Pro installations will have most of their options pre-configured. When you log in to a computer and start ArcGIS Pro for the first time, you should be presented with the following screen.
As before, click the blue SSO box to log in. You'll be taken to UGA's Single Sign-On Service page, where you'll sign in with your MyID again. Once your sign-in is complete, you'll be taken to the landing screen of ArcGIS Pro.

If you have any issues logging in to ArcGIS Pro or the USG ArcGIS community page, please contact the Franklin OIT Helpdesk at https://helpdesk.franklin.uga.edu
