Blackboard Collaborate Ultra

Collaborate Ultra is a browser-based web-conferencing platform that is available for use within eLC as well as on its own. It is accessible by any member of the UGA community, and non-UGA users can easily be invited to join Ultra sessions, and sessions can be joined via computer, mobile device, or phone. The interface is modern and clutter-free, with an aesthetic more closely resembling the interfaces on our personal devices, making session navigation easy and intuitive while still maintaining a high degree of functionality.
